

Find the germs

Ink pad and sticky note game

Use the stamp, ink pad and sticky notes provided in the kit. Discuss with children *“some objects are touched by many people, and they are areas that may have bacteria or viruses that could make you sick. Some examples are doorknobs, shared toys, telephones, and bathrooms.”*

Explain that children can stamp the ‘germ’ on the sticky-note to make a pretend germ. They can then spread these germs to areas that are commonly touched by putting the sticky notes on one of these objects, such as a toy bin or bathroom. *“These areas are places where you want to wash your hands after you touch and remember to wash these objects too.”* Some children can stamp ‘germs’, some children can place ‘germs’, and others can find the “germs”.
