

# Teach Younger Students

- Grade 4-6 students teach Kindergarten or Grade 1 students how to wash their hands. Grade 4-6 students can form groups and work with a few younger students to teach the six steps of handwashing. Then, with the Glo Germ lotion and UV flashlight, they can demonstrate handwashing, or have younger students practice handwashing.
- Grade 4-6 students can work with younger students to put the steps of handwashing into the correct order, like a puzzle. See [pages 2-8](#).

# Handwashing Puzzle

See following pages for larger images. Laminate if desired.

Students can work on remembering steps of handwashing by putting the cards in the correct order. The pictures are currently in the correct order (wet hands, apply soap, lather, rinse off soap, dry hands, and turn off tap).

**Wet hands**

**Apply plain soap**

**Rub hands together**

**Rinse your hands**

**Dry your hands**

**Turn off taps with paper towel**
